

course_student			
It is a pivot table between courses and students table for many to many relationship.			
 id	bigint(11)		
course_id	bigint(11)		
student_id	bigint(11)		

courses			
It will stores courses name and courses no.			
 id	bigint(11)		
course_no	varchar(64)		
course_title	varchar(64)		

course_teacher			
It is a pivot table between courses and teachers table that will store courses details.			
 id	bigint(11)		
course_id	bigint(11)		
teacher_id	bigint(11)		
scheduled	int(11)		
taken	int(11)		
start_date	varchar(64)		

students			
It will store details of students.			
 id	bigint(11)		
roll	bigint(255)		
name	varchar(64)		
email	varchar(64)		
phone	varchar(64)		

attendances			
It will records attendances of students.			
 id	bigint(11)		
course_id	bigint(11)		
student_id	bigint(11)		
is_present	int(1)		
class_date	varchar(64)		

class_logs			
It will record each classes information.			
 id	bigint(11)		
course_id	bigint(11)		
teacher_id	bigint(11)		
conducted_at	varchar(64)		
attended_students	int(11)		

heads			
It will store department heads details info.			
 id	bigint(11)		
name	varchar(64)		
email	varchar(64)		
password	varchar(64)		

teachers			
It will store details of teachers.			
 id	bigint(11)		
name	varchar(64)		
email	varchar(64)		
password	varchar(64)
